About Royal Facade

Royal Facade – is a prominent manufacturer of clinker thermal panels in Europe, providing advanced facade solutions to clients worldwide. We combine advanced technologies, high quality and modern design, creating durable and aesthetically perfect facade solutions.

Our Advantages:

- **Uncompromising Quality** – we use only certified materials that meet international standards.
- **Global Presence** – we deliver products and provide services to clients in various countries worldwide.
- **Competitive Terms** – we offer competitive prices and promotional deals.
- **Comprehensive Approach** – free consultations, measurements, 3D visualization and installation support.
- **Individual Solutions** – we help you choose the best option according to your needs.
- **Durability Guarantee** – we provide technical documentation and guarantee the quality of our products.

Royal Facade – Facades of a World-Class Standard!

Our Values

We create clinker thermal panels for building decoration and energy-efficient insulation — it's not just business, it's our calling. We know how to make your home warm, stylish, and durable, and we put the best the industry has to offer into our products.

- **Quality Without Compromise.** We offer only products we would use in our own homes and recommend to our loved ones.
- **Exclusivity in Every Detail.** We don't produce mass products — each panel is crafted considering the client's individual preferences, highlighting the uniqueness of every home.
- **Craftsmanship and Expertise.** We know our business thoroughly, continuously improve our technologies, and always move forward.
- **Competition Is an Opportunity for Growth.** We analyze the best and worst examples in the market to become even better.
- **Building a Sustainable Future.** By using energy-efficient technologies, we not only enhance comfort but also care for the environment and promote responsible resource use.

We believe in the conscious choice of our clients and proudly embody it in every Royal Facade thermal panel.

Production

- **Clinker thermal panel**

The Royal Facade TM clinker thermal panel is a monolithic structure consisting of a self-extinguishing insulation board (either expanded or extruded polystyrene foam, thickness from 30 to 250 mm at your choice) and ceramic, porcelain stoneware, or clinker tiles. We have a adhesion strength test protocol EAD 040914-00-0404.

- **Production technology**

The bonding process of the two materials occurs by pressing the tile onto the insulation panel using a one-component polyurethane adhesive that literally penetrates the structure of both materials throughout their thickness. This creates a monolithic and durable construction: decorative clinker + insulation = thermal panel.

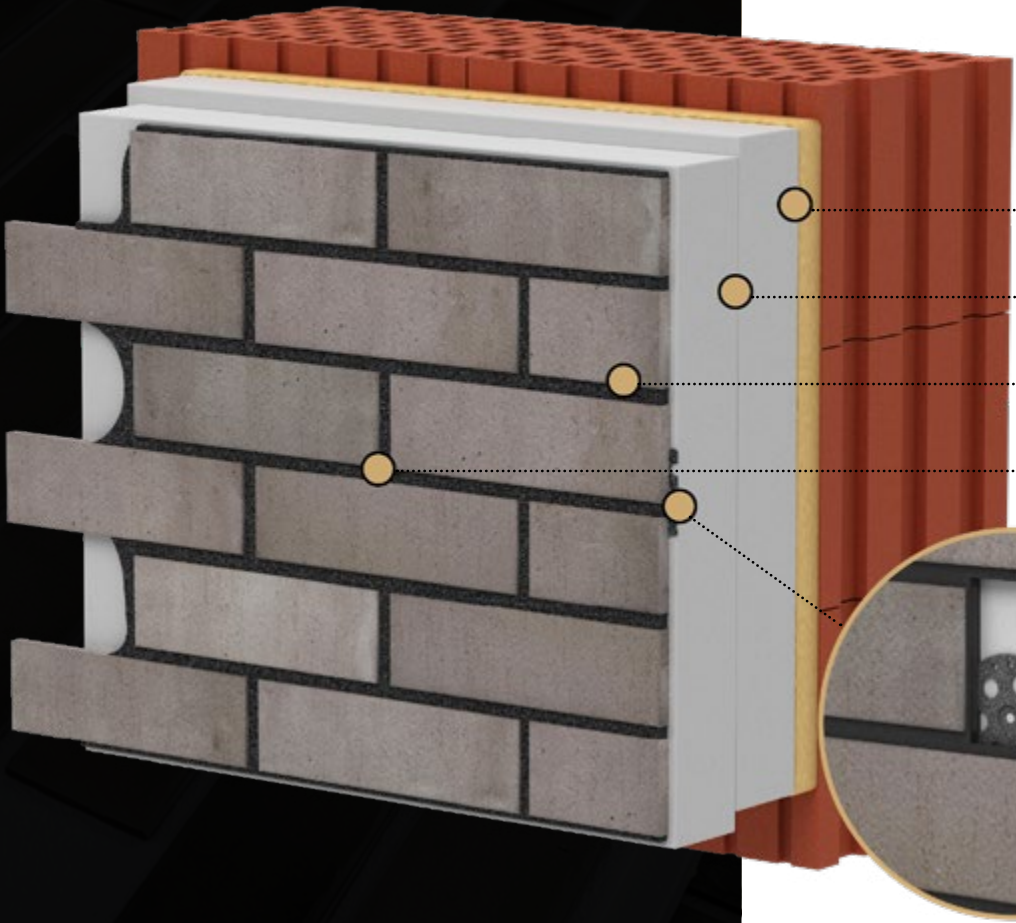

No adhesive mixture provides such a reliable bond without additional pressing that creates a penetrating effect into the material structures.

- **Design Features**

The interlocking joint system, designed according to the “rebate” principle, eliminates thermal bridges entirely, ensuring maximum energy efficiency.

Plastic rondel (anchoring elements)

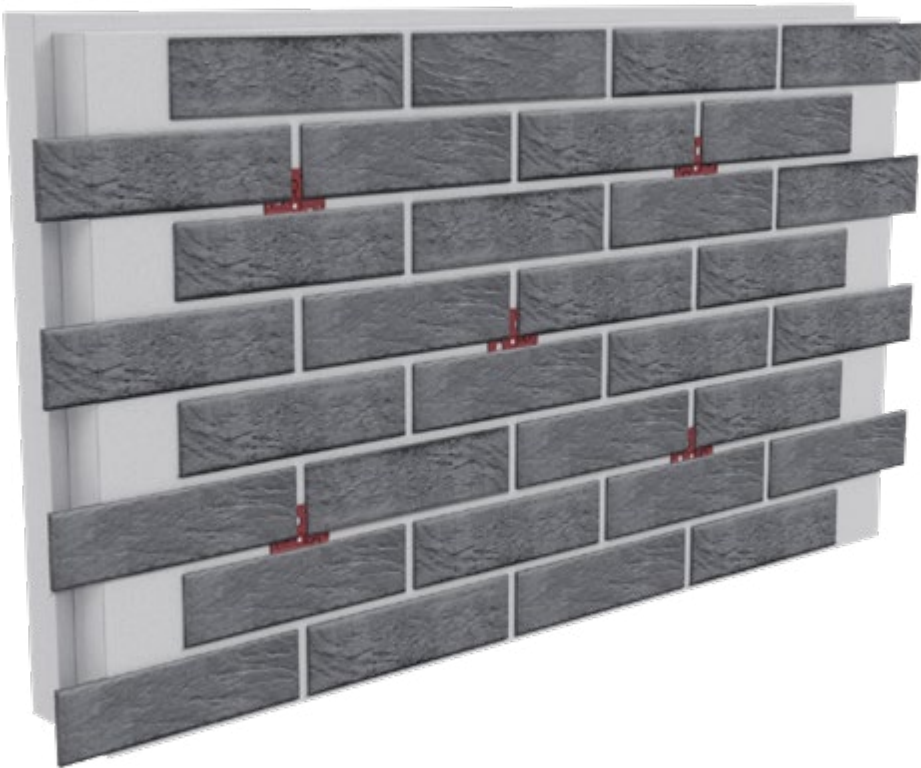

Interlocking joints

The Royal Facade TM clinker thermal panel is a monolithic structure consisting of a self-extinguishing insulation board (either expanded or extruded polystyrene foam, thickness from 30 to 250 mm at your choice) and ceramic, porcelain stoneware, or clinker tiles. We have an adhesion strength test protocol EAD 040914-00-0404.

Advantages of “F” format thermal panels:

- Competitive price.
- The tile is nearly fully embedded into the insulation layer (except for minor protruding parts); however, based on Test Protocol №211-323/124/18, the adhesion strength exceeds standard requirements by 4.7 times.
- A universal format suitable for both thermal insulation and decorative cladding.
- Rebate interlocking joint around the perimeter of the thermal panel.

Tile manufacturers we work with

King Klinker

Polish manufacturer of high-quality clinker tiles.

The history of Polish brand King Klinker began in 1972. The company has gained recognition as one of the most popular clinker tile manufacturers in Europe. Its key advantage lies in using traditional methods to produce high-quality clinker.

Golden Tile

Ukrainian manufacturer of ceramic tiles and porcelain stoneware.

Golden Tile is one of the largest ceramic tile producers in Eastern Europe, with an annual capacity of around 24 million m². The brand holds a strong leading position in the Ukrainian market and is also one of the country's top exporters.

Paradyz

Polish manufacturer of ceramic tiles.

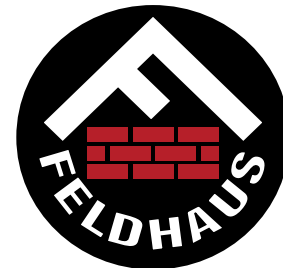

The Paradyz company is widely recognized as one of the global leaders in the production and distribution of premium-quality ceramic tiles. Although all manufacturing facilities are based in Poland, its products have earned a strong reputation far beyond national borders.

Cerrad

Polish manufacturer of finishing ceramics.

The European market offers a wide variety of high-grade finishing materials, with the Polish brand Cerrad standing out for its exceptional quality and design. Cerrad ceramic tiles are now available in over 50 countries worldwide, and the company consistently ranks among the most dynamic and popular manufacturers in the European tile industry.

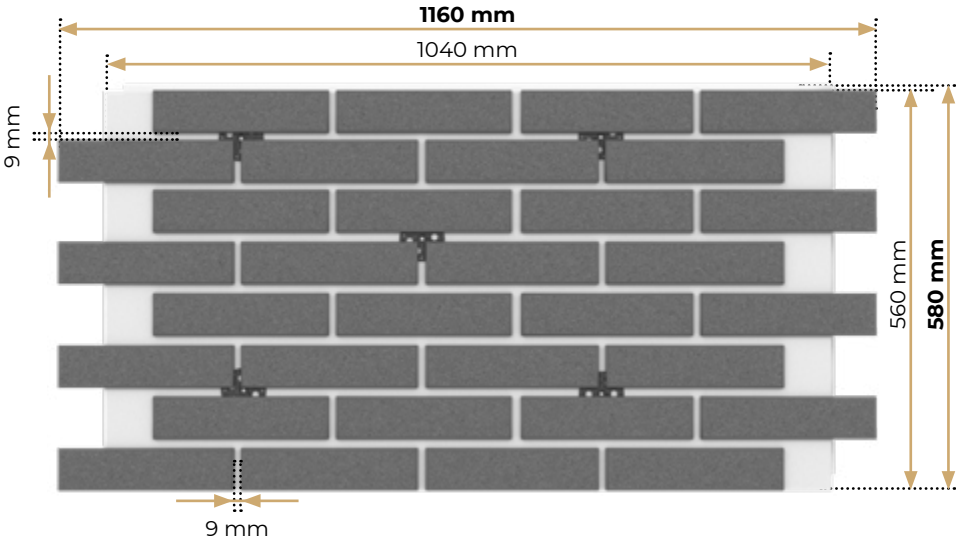

Feldhause Klinker

German manufacturer of clinker tiles and bricks.

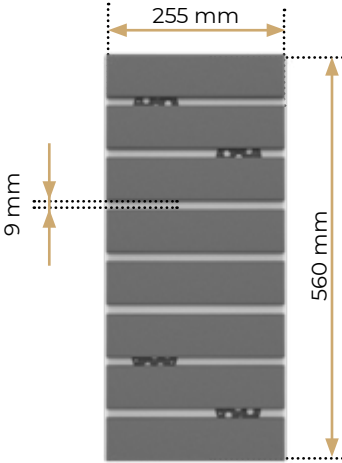

With a heritage spanning more than 160 years, the company is known for its commitment to quality, durability, and authentic design, with products exported to dozens of countries across the globe.

Certificates and patents

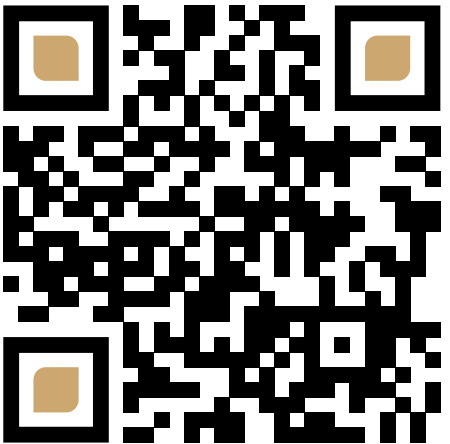

You can be assured of the quality of our products and the reasonableness of your choice. All our products are certified and meet all quality standards.

Our products have been highly rated according to the strict requirements of DBN and DSTU regulations in Ukraine. You can be confident: clinker thermal panels by TM RoyalFacade are a long-term and growing investment in construction! Certified according to **EAD 040914-00-0404.**

Among our certificates and patents are:

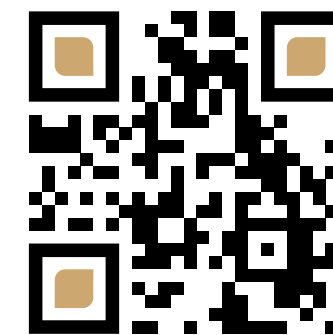

- EPS-90 Graphit Quality Certificate
- EPS-90 Graphit Fire Reaction Certificate
- EPS-90 Quality Certificate
- EPS-90 Fire Reaction Certificate
- XPS-35 Quality Certificate
- XPS-35 Fire Reaction Certificate

and others, available on our website:
<https://royalfacade.eu/certificates/> or upon request.

“Clinker Thermopanel Royal Facade™ combine modern European eco-technologies of energy efficiency with the aesthetic traditions of residential insulation.”
